

Powerful and easy-to-use ID card designer

smartID

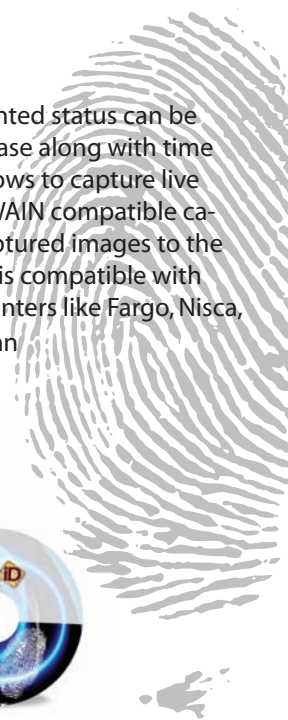

ID card Issuance Made Easy

Smart ID Software is the robust photo ID software solution that enables you to design, print and encode high security, professional ID cards. It features user friendly interfaces with easy to use card designer.

The software comes in two different editions which offer a powerful range of features for different applications, employee and visitor cards, access control, membership and loyalty cards, driving licenses, photo IDs, and any other use that requires identification

The Lite edition is the entry-level suitable for small organizations and the professional edition is for organizations with bigger number of members and requires network connection. With Smart ID security features you can encode data to barcodes, magnetic stripes & smart chips. It also support biometric and Signature capture options. Various Databases like MS- Excel, MS Access, MS SQL, and Oracle can be connected with Smart ID software. The advanced data filtering options enable you to perform batch printing of cards.

Card printed/unprinted status can be stored in the database along with time stamp. Smart ID allows to capture live photos with any TWAIN compatible cameras, and save captured images to the database. Smart ID is compatible with all major ID card printers like Fargo, Nisca, IDXpress & Pointman

- Live Image Capture
- Barcode Printing
- Biometric Capture
- Signature Capture
- Magnetic Stripe Encoding
- Smart Card Encoding
- Database Connectivity
